Scope of Delivery

MusicTAXI Test Number
Maintenance and Hotline 40

The Certification Body of the TÜV Management Service GmbH certifies that DIALOG4 System Engineering GmbH, Ludwigsburg, has established and applies a quality systems for Research & Development of MPEG related hard- and software products for the professional and consumer market, production management, quality control, sales and after-sales service. An audit was performed, report no. QM-F-98/1461. Proof has been furnished that the requirements according to DIN EN ISO 9001:1994 are fulfilled.

The MusicTAXI PAN-PRO is designed according to protection class 1 (EN 60950 / VDE 0805 / IEC 950). It is manufactured according to the electrotechnical regulations and fulfils the regulations for prevention of accidents 'Electrical Systems and Materials' (VBG4, §5 paragraph 4).

A Declaration of Conformity constitutes that the PAN-PRO corresponds to the EC directive: EMC 89/336/ EWG as well as the 'low voltage regulation' 72/23/ EWG with applied harmonised standards.

The MusicTAXI PAN-PRO is designed according to the EMC directive, with the harmonized standards DIN EN 55103-1 (June 97) interference radiation, ambiance E1 and DIN EN 55103-2 (June 97) resistance to jamming, ambiance E5.

Taking into consideration the demand on resistance to jamming, for the quality and impairment the intensity degree 4 of the 5-stage scale of the ITU/R recommendation 500-4 applies.

Note on EMV Measures

According to the requirements of the EMC directive, the regulations for the electromagnetic compatibility, it is necessary that the following measures have to be observed when using/manufacturing the connection cables:

- For all connections shielded cables should be used.
- The shields should be soldered to the GND connections and additionally to the connector shell directly.

General The MusicTAXI PAN-PRO is a desktop unit designed for the external remote operation of the MusicTAXI SL-PRO and VP-PRO. For installation no further preparations have to be observed.

With the PAN-PRO a MusicTAXI SL-PRO or a VP-PRO can be remotely operated. Every parameter for an audio connection can be set conveniently using the PAN-PRO. However, it is not possible to exchange the ISDN numbers between a PAN-PRO and MusicTAXIs.

Climate Operating temperature: -10 to +45 degrees Celsius
Relative Humidity: 30...90%.

Cabling Correct operation of the MusicTAXI PAN-PRO together with MusicTAXIs is only guaranteed when the cables, which are included in our scope of delivery, are used and when the technical specifications of the respective software version are taken into consideration.

Guarantee Unless otherwise stipulated, standard guarantee regulations are valid and applicable. Damages resulting from changes or improper repairs by the orderer or a third party are not covered by the guarantee.

Please note This manual is for the use of the owners and their staff only. The information in the manual, including all texts and drawings, are to be treated as confidential, and are not to be reproduced or published. The manual, its contents or any parts of it are not be passed on to third parties or copied in any form. Hereby the right to registered utility models or patent application is reserved explicitly. In the case of violation or non-compliance resulting in consequential losses. DIALOG4 may be entitled to claim damages according to the German BGB, HGB as well as the competition law and Patents Act.

Due to the further development for product improvement of the present series units, and alterations of certain industrial parts, it cannot be avoided that some parts might not be fully compatible. All technical alterations may be subject to change without notice.

Getting Started

Front Panel / Keypad

Explanation of Keypad Symbols

- | | | |

Getting Started

Connections / Interfaces

RS232/RS422 Serial Asynchronous Communication Interface

to connect the remote panel with the MusicTAXI SL-/VP-PRO

Format RS232/422: 9600 baud
 8 data bits
 1 stop bit
 no parity

Connector: 9pol Sub-D

Pin	1	2	3	4	5
Assignment	Rx+	Tx	Rx	Tx-	GND
RS232		■	■		■
RS422	■			■	■
Function*	I	O	I	O	

* relating to PAN-PRO

■ =assigned O=Output I=input

Pin	6	7	8	9
Assignment	Rx-	NC	NC	Tx+
RS232		■	■	
RS422	■			■
Function*	I			O

* relating to PAN-PRO

■ =not to be used! ■ =assigned O=Output I=input

Attention

For RS232 internal signals are assigned to pins 2, 3 and 5, for RS422 only pins 1, 4, 5, 6 and 9.

A fully assigned 1:1 cable to the PC might result in the damage to the PC and/or MusicTAXI! Only use cables according to the described configuration!

RS232/RS422 Serial, Asynchronous Communication Interface

to connect the remote panel to a PC (pls. see page 12)

Format RS232/422: 9600 - 38400 baud
 8 data bits
 1 stop bit
 no parity

Connector: 9pol Sub-D

Please see page 10, PORT 1 for pin assignment of sockets, function, signal direction, etc

Connection Cables

KB017 PORT1 to SL/VP-PRO (RS232)

serial cable (included in our scope of delivery)
 maximum length: 10m

SL-/VP-PRO connection

PAN-PRO connection

KB021 PORT1 to SL/VP-PRO (RS422)

serial cable
 maximum length: 500m.

SL-/VP-PRO connection

PAN-PRO connection

Getting Started

PC Connection / Software Update

KB003 Serial Cable to PC

The MusicTAXI is connected to your PC using a serial 9-pole or 25-pole cable (male/female).
 PC connection PAN-PRO connection

DB9 female

DB9 male

PC connection PAN-PRO connection

DB25 female

DB9 male

Software Update

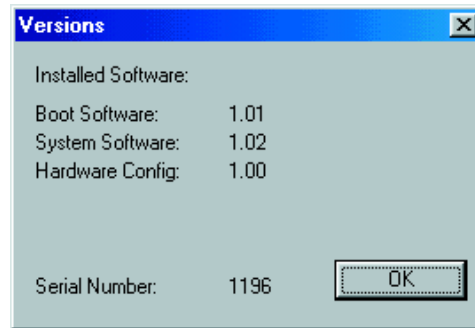

The software is updated with the MusicTAXI PC Remote system software (not included in the delivery). After installing the programm on your PC, in the designed directory, switch off your PC and ensure that the connection between PC and PAN-PRO, as well PAN-PRO and MusicTAXI VP- or SL-PRO is correctly set.

Now switch on all the units and start the MTRemote application. During initialisation, the type of unit is interrogated and displayed.

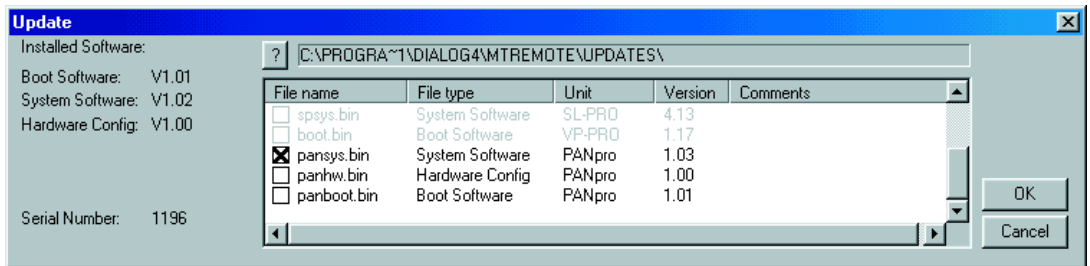

Info

The info function serves for checking the present software version of the connected PAN-PRO. All software parts including versions are displayed. You can also interrogate the serial number of your MusicTAXI.

Update

Contrary to the info function, not only the present software version but also the latest software versions are interrogated and displayed. You can additionally decide which software parts you would like to update in the MusicTAXI. Select the new version with the left mouse button and confirm the update function with OK.

Attention

Do not switch off your PC or PAN-PRO during the update process. After an unsuccessful update, an error message is displayed.

A dialogbox accompanies you throughout the update and informs you about the current process.

Getting Started

Connections / Interfaces

Relay Port

Connector: 15pol Sub-D

Pin	1	2	3	4	5
Assignment	REL	REL	REL	REL	REL
	1A	2A	3A	4A	5A

Assignment	REL	REL	REL	REL	IN
	3B	4B	5B	6B	2
Function*	O	O	O		I

* relating to PAN-PRO O=Output I=Input

REL1A - REL1B:

Potential free relay contact. The contact is closed as soon as the SL-PRO (or VP-PRO) has established a connection to another unit.

IN1 - IGND:

Optoelectronic coupler input, potential free. If +5V are fed between IN1 and 1GND, the PAN-PRO BUZZER is switched off.

If you would like to feed in a higher voltage, a resistor has to be superposed at IN1:

for 12V: 6k8 1/4W

for 24V: 18k 1/4W.

REL2A - REL2B...

REL6A - REL6B

Potential free relay contacts, not assigned at the moment.

IN2

Optoelectronic coupler input, potential free, not assigned at the moment.

Acoustic Signal Transmitter

Volume and function are set in the SYSTEM SETUP menu.

The BUZZER can be switched off using an external switching signal, pls. see IN1 – 1GND.

Power Supply

10..30V DC
0,70..0,24 A

Range: 10 ... 30 V DC, max. 6 VA

For the PAN-PRO we provide the power supply unit MAINY N1EFS, Type: 00390 372.

Connector: 3-pol Hirschmann connector

Type ELST 3308 RV FM8 05

Pin	1	2	3
Assignment	Vcc	■	GND

■ = not assigned

MAINY Power Supply Unit with Euro Connector

(included in the scope of delivery)

Input Voltage: 230 V

Power Range: 12 VA

Output Voltage: 12 V

Frequency: 45 - 65 Hz

Protection Class: II

Protection Type: IP 54

Short-circuit Proof.: Unlimited

Getting Started

System Setup

Main Menu SYSTEM SETUP

After switching the unit on and a short initializing sequence the 3 pages of the basic configuration menu of the MusicTAXI appears (pls. see also "Status Messages, page 34)

Select SYSTEM SETUP from the main menu with the UP/DOWN keys and confirm with ENTER.

ACCEPT CONFIGURATION

This sets up the call accept mode of the MusicTAXI. First you can set the accept mode **AUDIO DATA ENCODER** for the unit and transmission more or less specific and permanently. Then the MusicTAXI only accepts calls in the respective configuration. Or you can select the operation mode AUTO (Automatic Codec Detection). Then the MusicTAXI serves as a SLAVE and takes over the parameters of the calling unit automatically.

The AUTO mode is not available for AUDIO INPUT and USER DATA.

Algorithm

The **ALGORITHM** menu item serves for setting the desired data reduction procedure when calls are coming in. You can select between: LAYER 2, LAYER 3 and AUTO (G.711/G.722 calls are also accepted).

ISDN SYNC

The **ISDN SYNC** menu serves for setting the desired SYNChronization procedure.

```
AUDIO DATA ENCODER
ALGORITHM                AUTO
ISDN SYNC                 MusicTAXI
SAMPLINGRATE             AUTO
AUDIO MODE                AUTO
AUDIO INPUT              ANALOG
USERDATA                  1200 Baud
EXIT
```

You can select between:

MusicTAXI (DIALOG4 SYNC for 1 ... 6 B-channels)
PRIMA (CCS SYNC for 2 B-channels)
ZEPHYR (Telos SYNC for 2 B-channels)
NO SYNC (when using 1 B-channel)
NO SYNC (INV) when using 1 B-channel
AUTO - Automatic Codec Detection

Please note

By selecting PRIMA or ZEPHYR accept mode, a G.722 call cannot be received.

Sampling Rate

The **SAMPLING RATE** menu item serves for setting the desired sampling frequency when calls are coming in.

```
AUDIO DATA ENCODER
ALGORITHM                AUTO
ISDN SYNC                 MusicTAXI
SAMPLINGRATE             AUTO
AUDIO MODE                AUTO
AUDIO INPUT              ANALOG
USERDATA                  1200 Baud
EXIT
```

You can select between:

16, 22.05, 24, 32, 44.1, 48 kHz
AUTO (the sampling frequency of the calling unit is taken over).

Getting Started

System Setup

Audio Mode The menu item AUDIO MODE serves for setting the desired audio behavior, when calls are coming in.

```
AUDIO DATA ENCODER
ALGORITHM                AUTO
ISDN SYNC                MusicTAXI
SAMPLINGRATE            AUTO
AUDIO MODE               AUTO
AUDIO INPUT              ANALOG
USERDATA                 1200 Baud
EXIT
```

You can select between:

- MONO** Mono signal. The left input is used
- DUAL MONO** Two different signals which do not interfere with each other, e.g.
One channel - O sound
One channel - translation
- STEREO** In the same way as for DUAL MONO, each channel is coded separately, however, if on one channel less or no audio is transmitted, these bits are assigned to the other channel (i.e. bit assignment according to demand).
- JOINT STEREO** Comparable to MS stereophony (middle/side signal). It codes the sum of left and right and the difference between left and right; these are coded and transmitted separately (subjectively better quality at lower data rates).
- AUTO** The audio mode of the calling unit is taken over.

Audio Input

```
AUDIO DATA ENCODER
ALGORITHM                AUTO
ISDN SYNC                MusicTAXI
SAMPLINGRATE            AUTO
AUDIO MODE               AUTO
AUDIO INPUT              ANALOG
USERDATA                 1200 Baud
EXIT
```

The menu item **AUDIO INPUT** serves for setting the desired audio input, when calls are coming in. You can select between:

Analog
AES/EBU
S/PDIF

User Data

The menu item **USER DATA** serves for setting the desired ancillary data, when calls are coming in.

```
AUDIO DATA ENCODER
ALGORITHM                AUTO
ISDN SYNC                MusicTAXI
SAMPLINGRATE            AUTO
AUDIO MODE               AUTO
AUDIO INPUT              ANALOG
USERDATA                 1200 Baud
EXIT
```

You can select between:

- OFF (no ancillary data are transmitted)
- 1200, 2400, 4800 baud by Layer 2
- 1200, 2400, 4800, 9600 baud by Layer 3.

Please note If the transmission of ancillary data is switched off (OFF), the remote control signals are not transmitted either.

The lowest preset baud rate of the ancillary data is transmitted within the unit handshake framework.

Press ENTER to take over the presetting of the call acceptance. Press CANCEL and the presetting is not taken over.

Exit

Select EXIT to leave the menu item AUDIO DATA ENCODER and to get back to SYSTEM SETUP. Confirm with ENTER..

```
AUDIO DATA ENCODER
ALGORITHM                AUTO
ISDN SYNC                MusicTAXI
SAMPLINGRATE            AUTO
AUDIO MODE               AUTO
AUDIO INPUT              ANALOG
USERDATA                 1200 Baud
EXIT
```

Getting Started

System Setup

ISDN CONFIGURATION

```
SYSTEM SETUP
ACCEPT CONFIGURATION
ISDN CONFIGURATION
AUDIO LEVEL
INTERFACES
DELETE DATABASE
EXIT / STORE
```

The MusicTAXI has 12 different ISDN D-channel protocols. Please make sure that you have selected the correct protocol.

ISDN Protocol

```
ISDN CONFIGURATION
ISDN PROTOCOLL          ETSI
LOCAL NUMBERS
SPID NUMEBRS
DIALING
INCOMMING CALLS
EXIT
```

Decisive is the ISDN protocol of your connection, not the one of the partner unit! Alter the settings by pressing the ENTER button.

Local Numbers

If your local ISDN numbers are entered here they will be sent when establishing a connection. This is not necessary when the unit is operated at a S_0 connection, however, when the VP-PRO is connected to a private exchange it might be helpful (pls. see page 23).

```
ISDN CONFIGURATION
ISDN PROTOCOLL          ETSI
LOCAL NUMBERS
SPID NUMEBRS
DIALING
INCOMMING CALLS
EXIT
```

```
ENTER LOCAL ISDN NUMBER:
ISDN#1 █
ISDN#2
PRESS 'ENTER' TO EDIT N
```

Press ENTER and input the wanted telephone number using the numeric keypad. To change to another input field and/or finalize your entry, press ENTER.

The entered telephone number can be altered, copied or deleted by pressing the respective keys.

DEL

COPY

SPID Numbers

The SPID numbers, you enter here, are also sent when the connection is established. This is only necessary when operated on US or Canadian networks.

```
ISDN CONFIGURATION
ISDN PROTOCOL          ETSI
LOCAL NUMBERS
SPID NUMEBRS
DIALING
INCOMMING CALLS
EXIT
```

Enter the SPID number as described above for LOCAL NUMBERS.

```
ENTER SPID NUMBERS

SPID#1 ■
SPID#2

PRESS "ENTER" TO EDIT NEXT NUMBER
```

Press ENTER to finalize your entry.

Dialing

```
ISDN CONFIGURATION
ISDN PROTOCOL          ETSI
LOCAL NUMBERS
SPID NUMEBRS
DIALING
INCOMMING CALLS
EXIT
```

DIALING ATTEMPTS

This menu item serves for setting the desired dialing attempts. You can select between 1 and 5.

```
DIALING
DIALING ATTEMPS       2
DIALING DELAY         10 s
REDIALING ATTEMPS     2

EXIT
```

DIALING DELAY

This menu item serves for setting the desired time between the dialing attempts. You can select between 0 ... 60 seconds.

REDIALING ATTEMPTS

This menu item serves for setting the desired redialing attempts, if a connection had not been interrupted by the calling MusicTAXI. You can select between 1 and 5.

EXIT

Press EXIT to confirm your basic settings or alterations.

Incoming Calls

The last menu item **INCOMING CALLS** defines the behavior of the MusicTAXI when it is operated at a S_0 connection together with other units.

```
ISDN CONFIGURATION
ISDN PROTOCOL          ETSI
LOCAL NUMBERS
SPID NUMEBRS
DIALING
INCOMMING CALLS
EXIT
```

```
INCOMMING CALLS
ACCEPT TEL. CALLS      ALWAYS
ACCEPT MPEG/G.722 CALLS ALWAYS
TEST CALLED NUMBER    NO
BUZZER                 OFF
EXIT
```

First set **ACCEPT TELEPHONE CALL** to:
ALWAYS every telephone call is accepted
NEVER all telephone calls are rejected
ASK manual confirmation of each call is requested by the unit.

With the menu item **ACCEPT MPEG/G.722 CALLS** the behavior for incoming MPEG/G.722 calls is determined. The setting options are described above:

ALWAYS, NEVER and ASK

The menu item **TEST CALLED NUMBER** activates the interrogation of the MSN number when calls are coming in. You have to enter the correct MSNs of your connection in the menu item LOCAL NUMBERS (pls. see page 20).

In case of EURO ISDN, the MSN is usually the ISDN number of your connection without the area code, in case of private exchanges the number of your extension.

Only activate this function (YES), if you operate other units (e.g. a telephone, telefax or PC card) at the same ISDN connection in addition to the MusicTAXI.

Attention The incorrect configuration of only one unit might result in the rejection of all calls.

BUZZER

The built-in acoustic BUZZER serves as a telephone ringer. You can either switch the buzzer off (OFF) or adjust the volume. You can select between 1 (low) and 4 (high) using the ENTER key.

```
INCOMING CALLS
ACCEPT TEL. CALLS      ALWAYS
ACCEPT MPEG/G.722 CALLS  ALWAYS
TEST CALLED NUMBER     NO
BUZZER                  3
EXIT
```

You can also switch the BUZZER off via an external switch signal as described above for RELAY PORT, IN1-IGND on page 14.

EXIT

Select EXIT to confirm your settings and to get back to SYSTEM SETUP. Confirm with ENTER.

Getting Started System Setup

AUDIO LEVEL

```
SYSTEM SETUP
ACCEPT CONFIGURATION
ISDN CONFIGURATION
AUDIO LEVEL
INTERFACES
DELETE DATABASE
EXIT / STORE
```

Level Range

This menu item allows the adjustment at the level range: 50 or 80 dB.

```
AUDIO LEVEL
LEVEL RANGE      50 dB
HEADROOM         0 dB
ADJUST I/O LEVELS
EXIT
```

Headroom

This menu item serves for setting the desired headroom. You can select between 0 and 20 dB steps. Ex factory the setting is 0 dB. The scale display in the online menu is moved.

Attention

Clipping limit is at 0 dB + selected headroom!

Adjust I/O Levels

This menu item serves for setting the analog INPUT and OUTPUT level for the left and right channel. Ex factory the levels are set at +12 dBu, the headroom is 0 dB.

This means: input level = output level = 12 dBu.

7 KHZ
PgUp

MUSICAN
PgDn

UP

DOWN

PgUp and PgDn selects the respective channels. With the UP and DOWN keys the respective level values are adjusted in 0.5 dB steps.

INTERFACES

```
SYSTEM SETUP
ACCEPT CONFIGURATION
ISDN CONFIGURATION
AUDIO LEVEL
INTERFACES
DELETE DATABASE
EXIT / STORE
```

External SYNC INPUT

The MusicTAXI has a sample rate converter at the audio INPUT and OUTPUT:

```
INTERFACES
EXTERNAL SYNC INPUT  DISABLED
ALARM SIGNALS       OFF
EXIT
```

For the external SYNChronization of the digital output you can select between:

- | | |
|------------|---|
| DISABLED | Word clock is generated from the transmission clock |
| DIGITAL IN | Word clock is generated from the AES/SPDIF input signal |
| SYNC IN | Word clock is taken from the SYNC IN |

Alarm Signals

```
INTERFACES
EXTERNAL SYNC INPUT  DISABLED
ALARM SIGNALS       OFF
```

If the signals are switched OFF, please see the MusicTAXI SL-PRO/VP-PRO manuals for the behavior ALARM CONTROL INTERFACE. Otherwise you can select between:

- | | |
|---------|--|
| CON | The signal is set at Pin 19, as soon as the decoder is SYNChronized – i.e. when the connection is OK. |
| DIS | The signal is set at pin 18, if the line had been disconnected from the partner unit or due to an ISDN failure |
| CON+DIS | Both signals are set. |

PRESS 'ENTER' TO EDIT NEXT NUMBER
```

Getting Started

Data Input

The cursor flashes when you can start the input of the ISDN numbers. You can change between the ISDN input fields by using the ENTER button.

Please note The ISDN SYNC can only be selected after you have entered the ISDN number.

```
DATA INPUT
  ISDN NUMBERS
  ISDN SYNC
  AUDIO DATA ENCODER
  SHORTNAME
  EXIT/STORE
```

ISDN SYNC The **ISDN SYNC** menu serves for selecting the codec of your connection partner. The possible SYNC mode are:

- MusicTAXI (DIALOG4 SYNC for 1 ... 6 B-channels)
- PRIMA (CCS SYNC for 2 B-channels)
- ZEPHYR (Telos SYNC for 2 B-channels)
- NO SYNC when using 1 B-channel
- NO SYNC (INV) when using 1 B-channel
- AUTO - Automatic Codec Detection

Please see chapter Audio Compatibility for the presettings for ZEPHYR and PRIMA (pages 38-39).

Audio Data Encoder

In this menu you can determine all audio parameters for the planned connection.

```
DATA INPUT
  ISDN NUMBERS
  ISDN SYNC
  AUDIO DATA ENCODER
  SHORTNAME
  EXIT/STORE
```

The menu leads you from **ALGORITHM** (Layer 2, Layer 3, G.711, G.722), BITRATE to USERDATA. Please do not forget to define the audio input correctly. AES/EBU for digital units with professional format, S/PDIF for digital units with consumer format, ANALOG for analog units. Press EXIT to leave the menu.

G.722 with H.221 or SRT SYNC

If you enter a G.722 partner in the DATA INPUT menu, please observe the following order:

1. Enter the ISDN number.
2. Enter G.722 in ENCODER DATA
3. Determine the SYNC modes in ISDN SYNC.

```
DIRECTORY
1 BR3 089663410 16 M X 64 G7 S
2 D4 07141226622 48 J A 256 L3 M
3 SWR3 071145632 16 M X 64 G4 H
4 BR3 089663410 32 S A 128 L3 M
5 48 M X 64 L3
6 48 M X 64 L3
```

Press EXIT/STORE to leave the menu. Now H = H.221 or S = SRT is displayed in the directory for the selected SYNChronisation procedure.

Short Name

As soon as you have entered the ISDN number, you can enter up to 7 letters and numbers as an abbreviated name of your connection partner.

```
DATA INPUT
ISDN NUMBERS
ISDN SYNC
AUDIO DATA ENCODER
SHORTNAME
EXIT/STORE
```

```
ENTER SHORT NAME - ENTRY 1
SHORT NAME: DIALOG4
PRESS 'ENTER' TO EDIT
```

With UP and DOWN the alphabet is displayed, via numeric keypad all numbers are available. By pressing the ENTER key you leave the menu.

Exit/Store

Press EXIT/STORE to finalize your entry. The entered data is stored and you can select them using the cursor for your connection establishment.

Getting Started

Data Input

X.21 Mode To activate the X.21 interface, enter an 'X' in the ISDN#1 field, by using the * key.

CODEC LOOP If nothing has been entered for ISDN#1, the MusicTAXI starts in the operation mode CODEC LOOP. This serves as test for the coded audio signal (without ISDN).

Explanations

Call Acceptance with ISDN SYNC AUTO The function AUTO (Automatic Detection of the calling Unit) is entered in THE SYSTEM SETUP/ACCEPT CONFIGURATION. The function ISDN SYNC AUTO has priority over all other entries. This means, if AUTO is set and the MusicTAXI is called by any competitor's codec (Telos ZEPHYR, CCS CDQPRIMA, GSM telephone, analog telephone, etc.) the MusicTAXI sets itself to the audio parameters incl. SYNC modes of the calling unit automatically. This might last up to 30 seconds.

However, the set parameters of the SYSTEM SETUP/ACCEPT CONFIGURATION are taken over, if the MusicTAXI is called by a MusicTAXI.

Connection Establishment with ISDN SYNC AUTO When a connection partner is entered into the telephone directory, ISDN SYNC and audio parameters can be preset in the configuration. However, if ISDN SYNC AUTO had been entered, it has priority over all other setting, i.e. if a connection is established to competitor units (Telos ZEPHYR, CCS CDQPRIMA, GSM telephone, analog telephone, etc.) the MusicTAXI sets itself to the audio parameters incl. SYNC modes of the remote unit automatically. This might last up to 30 seconds.

Connection Establishment with CODEC LOOP In the operation mode CODEC LOOP, the incoming audio signal is coded first and then transmitted via the decoder to the output.

X.21 Operation In the operation mode X.21, MPEG data is transmitted and received via the X.21 interface. The network clock has to be identical to the bit rate, which had been entered in the configuration menu.

Main Menu CONNECT

The respective ISDN connection can be established quickly and easily because the built-in telephone directory permits 96 entries, each of which can be individually configured. For establishing the connection you can choose between dialing via telephone directory, abbreviated entry and entry number or manual input using the numeric keypad

```
MAIN MENU
CONNECT
DATA INPUT
SYSTEM SETUP
```

Establishing a Connection by Using the Telephone Directory

Select CONNECT from the main menu and press ENTER to confirm. The ISDN telephone directory with 96 entries appears.

```
DIRECTORY
1 BR3 089663410 48 M X 128 L2 P
2 D4 07141226622 48 J A 256 L3 M
3 SWR3 071145632 44 M X 256 L2 M
4 SWR3 071145632 16 M X 64 G7 H
5 BR3 089663410 32 S A 128 L2 P
6 BR3 089663410 32 M X 64 L3 Z
```

The abbreviated name of your connection partner, the ISDN number, the selected audio parameters as well as the name of the partner codec, which are assigned to each entry, are displayed. Press ENTER to confirm and start.

The MusicTAXI informs you permanently on the present transactions.

```
CALLING ... 1/6
07141226622
```

After the successful synchronization your MusicTAXI displays the message ISDN OK and goes to the on-line menu. If the connection is rejected the MusicTAXI displays ERR(OR) and the reason for the rejection.

Connection Establishment

Quick Dial Connection Establishment

The 96 entries can be selected via quick dial assignments. Press the key QUICK DIAL.

The menu interrogates the entry number of your connection partner (from 01 to 96).

The dialing is effected automatically with the pre-set parameters.

Establishing a Connection Using the Numeric Keypad

First you have to determine the transmission mode. Via keypad you select between TELEphone (3.1 kHz), 7kHz (G.722/H.221, G.722/SRT), MUSICAM or LAYER 3.

The input menu asks for the ISDN number to be entered using the numeric keypad as usual. Dialing is initiated by pressing the ENTER key.

Please note

The connection parameters are determined as follows:
When entering only one ISDN number: 64 kbps, 48 kHz, mono, user data 1200 baud.
When entering two ISDN numbers: 128 kbps, 48 kHz, joint stereo, user data 1200 baud.
The audio input is taken from the ACCEPT CONFIGURATION. The used ISDN SYNC is always AUTO. You can select between AUTO, H.221 and SRT for the G.722 mode.

X.21 Connection Establishment

Select an entry with 'X' as the first number of the ISDN number from the telephone directory.

CODEC LOOP Connection Establishment

Select an entry without an ISDN number from the telephone directory. The connection is established either via telephone directory or quick dial.

Connection Monitoring

You can easily monitor your audio transmission. After the connection is established and the audio parameters are exchanged, the on-line transmission menu is displayed. It informs you on the send and receive levels, connection time as well as set headroom and ISDN SYNC. In addition to the send (Tx) and receive configuration (Rx) the ISDN number of your connection partner is displayed.

SYNC Display

The SYNC display in the Rx path confirms that the decoder of your connection partner receives correct data.

The SYNC display only appears, if the connection is established between MusicTAXIs, not if it is established to competitor's codecs.

Connect Menu

If the ENTER key is pressed during a connection, the CONNECT MENU is displayed without line disconnection. It provides the following possibilities:

- | | |
|--------------------|---|
| PREVIOUS MENU | return to former display |
| AUDIO DATA ENCODER | alteration of audio parameters and audio inputs |
| ADJUST I/O LEVEL | alteration of INPUT/OUTPUT level actuator |
| DISCONNECT | disconnection |

Disconnection

A connection is ended by pressing the HANG UP key twice within 10 seconds (during the flashing of the HANG UP LED). Otherwise the disconnection is ignored. After the disconnection the message:

is displayed. On the display of your connection partner the message 'REMOTE DISCONNECT' appears.

After the disconnection the MusicTAXI VP-PRO changes to the standby mode, awaiting the next connection command or incoming calls. If the VP-PRO is called, it is configured to the calling codec automatically irrespective of whether the unit is called by a telephone, telephone booth or studio: The MusicTAXI VP-PRO reacts fully automatically and guarantees the audio transmission.

Status Messages

In the online menu the following messages can be displayed:

Status Messages	Possible Cause
• NO X.21 CLOCK	No X.21 clock was determined.
• ILLEGAL X.21 CLK	The measured X.21 clock does not correspond to a ISO data rate. The measured clock frequency is displayed.
• NO INPUT SIGNAL	The AES or SPDIF input has been set and there is no signal at the selected input.
• DSP TIMEOUT	On access to the DSPs there is no confirmation message.
• ISDN PIPELINE OVERFLOW	ISDN operation is not possible.
• REMOTE PIPELINE OVERFLOW	The remote port does not respond.
• INITIALIZING... (RS232) or (RS422)	No MusicTAXI is connected or switched on.

Error Codes	Possible Cause	Test Point/ Correction
<ul style="list-style-type: none"> • S BUS NOT RESPONDING 	<p>The MusicTAXI could not establish a communication to the ISDN connection:</p> <ul style="list-style-type: none"> • ISDN cable not plugged in • ISDN cable damaged • ISDN connection not in operation • Both B-channels of this connection are already used by another unit. 	<ul style="list-style-type: none"> • Check ISDN cable and connection and try again.
<ul style="list-style-type: none"> • CHANNEL UNACCEPTABLE • CALL IN AN ESTABLISHED CHANNEL • USER BUSY • NON-SELECTED USER CLEARING • RESPONSE TO STATUS INQUIRY 	<p>The MusicTAXI could not establish a connection to the entered number:</p> <ul style="list-style-type: none"> • Partner has already established a connection (busy) • The ISDN number is wrong. 	<ul style="list-style-type: none"> • Check entered ISDN number and/or try again later.
<ul style="list-style-type: none"> • UNALLOCATED NUMBER • NO ROUTE TO SPECIFIED NETWORK • NO ROUTE TO DESTINATION • NUMBER CHANGED • DESTINATION OUT OF ORDER • INVALID NUMBER FORMAT • FACILITY REJECTED 	<p>The MusicTAXI could not establish a connection to the entered ISDN number:</p> <ul style="list-style-type: none"> • the ISDN number is wrong and does not exist. 	<ul style="list-style-type: none"> • Check entered ISDN number and/or try again later.
<ul style="list-style-type: none"> • NORMAL CALL CLEARING • NO USER RESPONDING • NO ANSWER FROM USER • CALL REJECTED • NORMAL, UNSPECIFIED 	<p>The MusicTAXI could not establish a connection to the entered ISDN number:</p> <ul style="list-style-type: none"> • The ISDN number is wrong or does not exist • The called unit is not switched on or connected. 	<ul style="list-style-type: none"> • Check ISDN number and try again later. • Check status of the partner unit

ISDN Error Codes

Error Codes	Possible Cause	Test Point/ Correction
<ul style="list-style-type: none"> • NO CHANNEL AVAILABLE • NETWORK OUT OF ORDER • TEMPORARY FAILURE • SWITCHING EQUIPMENT CONGESTION • ACCESS INFORMATION DISCARDED • CHANNEL NOT AVAILABLE • RESOURCES UNAVAILABLE 	<p>The ISDN network causes these error codes, i.e. the connection cannot be established due to the ISDN net. Possible causes could be:</p> <ul style="list-style-type: none"> • No B-channel available, all channels used by another unit at the moment • ISDN net overloaded. 	<ul style="list-style-type: none"> • Try again later
<ul style="list-style-type: none"> • INTER. NETWORKING, UNSPECIFIED 	<p>The cause for this error code is the change over between different ISDN nets of different providers, e.g. from a private one to the Telecom or foreign connections.</p>	<ul style="list-style-type: none"> • Try again later
<ul style="list-style-type: none"> • INTERNAL TIMEOUT 	<p>During the connection establishment a time out occurred.</p>	<ul style="list-style-type: none"> • Check ISDN number and protocol and try again later.
<ul style="list-style-type: none"> • QUALITY OF SERVICE UNAVAILABLE • REQUESTED FACILITY NOT SUBSCRIBED • BEARER CAPABILITY NOT AUTHORIZED • BEARER CAPABILITY NOT AVAILABLE • SERVICE OR OPTION NOT AVAILABLE • BEARER CAPABILITY NOT IMPLEMENTED • CHANNEL TYPE NOT IMPLEMENTED • REQUESTED FACILITY NOT IMPLEMENTED • ONLY RESTRICTED DIG. INFO AVAILABLE • SERVICE OR OPTION NOT IMPLEMENTED 	<p>The cause for this error code is that one function is not supported by the ISDN net, which the MusicTAXI, however, needs. Further call attempts will result in the same error code.</p> <ul style="list-style-type: none"> • Set ISDN protocol is wrong 	<ul style="list-style-type: none"> • Check ISDN protocol. If the protocol is correct, establish a test connection in the telephone mode to check the cleared services. If the connection can be established, the service 'Data transfer' is not cleared for the ISDN connection of the calling MusicTAXI. The service has to be cleared by the provider.

Error Codes	Possible Cause	Test Point/ Correction
<ul style="list-style-type: none"> • INVALID CALL REFERENCE VALUE • IDENTIFIED CHANNEL DOES NOT EXIST • CALL IDENTITY IN USE • INCOMPATIBLE DESTINATION • DEST. ADDRESS MISSING/ INCOMPLETE • INVALID TRANSIT NETWORK SELECTION • INVALID MESSAGE, UNSPECIFIED • MANDATORY ELEMENT MISSING • MESSAGE TYPE NOT IMPLEMENTED • ILLEGAL MESSAGE • INFORM. ELEMENT NOT IMPLEMENTED • INVALID INFORMATION ELEMENT • MESSAGE INCOMPATIBLE TO CALL STATE • RECOVERY ON TIMER EXPIRY • PROTOCOL ERROR, UNSPECIFIED 	<p>Generally a wrongly set ISDN protocol is the cause for the error code.</p>	<ul style="list-style-type: none"> • Check set ISDN protocol and try again.
<ul style="list-style-type: none"> • " --- " <p>ONLY BY US-PROTOCOLS</p>	<p>There is no error code from the ISDN net. It could be that the B-channel was disconnected by the MusicTAXI itself or the partner unit.</p>	<ul style="list-style-type: none"> • Check entered ISDN number and try again.
<ul style="list-style-type: none"> • SPID REQUEST PENDING 	<p>The request for the SPID numbers has not yet been answered.</p>	<ul style="list-style-type: none"> • Check SPID number and connection.
<ul style="list-style-type: none"> • SPID FAILED 	<p>SPID was rejected by the ISDN.</p>	
<ul style="list-style-type: none"> • ILLEGAL SPID 	<p>The entered SPID number is too short.</p>	<ul style="list-style-type: none"> • Check SPID number and try again.
<ul style="list-style-type: none"> • SPID MISSING 	<p>An US protocol has been selected, however, no SPID number entered.</p>	<ul style="list-style-type: none"> • Enter SPID number and

Audio Compatibility

In order to establish a connection between a MusicTAXI, ZEPHYR and PRIMA the following configurations have to be set:

LAYER 2 with 64 kbps

MusicTAXI	ZEPHYR	CDQPRIMA
ISDN SYNC: NO SYNC	Compat: ZEPHYR	Encoder: Line FMT: 1LN
ALGORITHM: LAYER 2	Xmt: L2 Mono	Algorithm: MPEG L2
AUDIO MODE: MONO	Rcv: L2	Algo mode: Mono
DATA RATE: 64 kbps	Rate: 64 kbps	Bit rate: 64 or AUTO
DATA CHANNEL: OFF		Decoder: Line FMT: 1LN
		Indep: Yes
		Algorithm: MPEG L2
		Bit rate: 64 or AUTO
		or: Speed dial: Nr. 25

LAYER 2 with 128 kbps

MusicTAXI	ZEPHYR	CDQPRIMA
ISDN SYNC: PRIMA	Compat: ZEPHYR	Encoder: Line FMT: CCS2 LN
ALGORITHM: LAYER 2	Xmt: L2 M/DM/JS	Algorithm: MPEG L2
AUDIO MODE: MONO/ D. MONO/ STEREO/ J. STEREO	Rcv: L2	Algo mode: M/DM/S/JS
DATA RATE: 128 kbps	Rate: 64 kbps	Bit rate: 128 or AUTO
DATA CHANNEL: OFF		Decoder: Line FMT: CCS2 LN
		Indep: Yes
		Algorithm: MPEG L2
		Bit rate: 128 or AUTO
		or: Speed dial: Nr. 27

LAYER 3 with 64 kbps

MusicTAXI	ZEPHYR
ISDN SYNC: NO SYNC (INV)	Compat: ZEPHYR
ALGORITHM: LAYER 3	Xmt: L3 Dual
AUDIO MODE: MONO	Rcv: L3 Mono
DATA RATE: 64 kbps	Rate: 64 kbps
DATA CHANNEL: OFF	

LAYER 3 with 128 kbps

MusicTAXI	ZEPHYR
ISDN SYNC: ZEPHYR	Compat: ZEPHYR
ALGORITHM: LAYER 3	Xmt: L3 Stereo/ Joint Stereo
AUDIO MODE: DM/S/JS	Rcv: L3 Stereo
DATA RATE: 128 kbps	Rate: 64 kbps
DATA CHANNEL: OFF	

Audio Compatibility Number Codes in Standby Mode

G.722 with 64 kbps

MusicTAXI		ZEPHYR	CDQPRIMA
ISDN SYNC:	SRT	Compat: ZEPHYR	Encoder: Line FMT: ILN
ALGORITHM:	G.722	Xmt: G.722	Algorithm: G.722
AUDIO MODE:	MONO	Rcv: G.722	Algo mode: M1
DATA RATE:	64 kbps	Rate: 64 kbps	Bit rate: 64 kbps
DATA CHANNEL:	OFF		Decoder: Line FMT: ILN
			Algorithm: G.722
			Bit rate: 64 kbps

In Layer 2 and 3, you can only select the sampling rates 32 kHz or 48 kHz. The settings for both units have to be identical

Number Codes

When the MusicTAXI is in standby mode, you can select from the main menu the following functions by entering certain number codes:

Audio Test (88888)

Audio loop without encoder/decoder.

By pressing the ENTER key you can change the audio input to AES/EBU or S/PDIF.

By pressing 1, 2, 3 you can change the sampling frequency. By pressing HANG up you leave the AUDIO TEST.

99999 Interrogation of the PAN-PRO software versions.

77777 Interrogation of the MusicTAXI's software version which is connected to the PAN-PRO.

Reset (3+6+9) By pressing 3+6+9 simultaneously, reset will be started.

**Technical Data
MusicTAXI PAN-PRO**

Desktop unit for remote operation of MusicTAXI SL-PRO or VP-PRO.

Dimensions

260 x 215 x 10/55 mm, weight approx. 2.5 kg

Operating Temperature

-10 ... +45 degrees Celsius, no fan

Relative Humidity

30 ... 90 %

Graphical Display

240 x 64 dots

Keypad

Numeric keypad

Power Supply

10 ... 30 V AC/DC, 0.70 ... 0.24 A, external power supply

**Serial, Asynchronous
Interfaces**

Port 1: RS232/RS422 for remote control of MusicTAXI VP-/SL-PRO
Port 2: RS232/RS422 for software downloading

Connection Control

Online Menu with the following displays:
Peak level Tx (send), peak level Rx (receive), ISDN number of the connection, encoder configuration, decoder configuration, decoder SYNChronization of the partner codec, selected headroom adjustment, on-line connection time

Directory Entries

96 individual entries can be stored separately:
name, ISDN number, audio configuration, ISDN SYNC mode (name of the partner codec)

All technical alternations may be subject to change without notice.

Scope of Delivery

MusicTAXI PAN-PRO
Mainy Power Supply with EURO connector
Serial cable (KB017), length: 5m
Manual for MusicTAXI PAN-PRO

**MusicTAXI
Test Number**

Call the DIALOG4 test number +49 7141 22 66 22.
Audio is permanently connected.

**Maintenance
and Hotline**

The MusicTAXI PAN-PRO has no user-serviceable parts.
In the case of possible technical problems, please contact our hotline:

DIALOG4 Hotline: 01 80 - 5 25 74 28
CET: 9.00 to 18.00 hours
